food security and agricultural commodity markets and will cost the EU 3.5 trillion Euro over the next 7 years. Contributors include top political negotiators and leading EU experts and academic analysts.

Foot and mouth disease (FMD) is currently regarded as one of the world's worst animal plagues. But how did this label become attached to a curable disease that poses little threat to human health? And why, in the epidemic of 2001, did the government's control strategy still rely upon Victorian trade restrictions

# Read Online Agriculture P2 Memo November 2013

and mass slaughter? This groundbreaking and well-researched book shows that, for over a century, FMD has brought fear, tragedy and sorrow—damaging businesses and affecting international relations. Yet these effects were neither inevitable nor caused by FMD itself but were, rather, the product of the legislation used to control it, and in this sense FMD is a 'manufactured' plague rather than a natural one. A Manufactured Plague turns the spotlight on this process of manufacture, revealing a rich history beset by controversy, in which party politics, class

Grade 11 Review  
relations, veterinary ambitions, agricultural practices, the priorities of farming and the meat trade, fears for national security and scientific progress all made FMD what it is today.

For many Americans who live at or below the poverty threshold, access to healthy foods at a reasonable price is a challenge that often places a strain on already limited resources and may compel them to make food choices that are contrary to current nutritional guidance. To help alleviate this problem, the U.S. Department of Agriculture (USDA) administers a number

# Read Online Agriculture P2

## Memo November 2013

of nutrition assistance programs designed to improve access to healthy foods for low-income individuals and households. The largest of these programs is the Supplemental Nutrition Assistance Program (SNAP), formerly called the Food Stamp Program, which today serves more than 46 million Americans with a program cost in excess of \$75 billion annually. The goals of SNAP include raising the level of nutrition among low-income households and maintaining adequate levels of nutrition by increasing the food purchasing power of low-income families. In response to questions about

# Read Online Agriculture P2

## Memo November 2013

whether there are different ways to define the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet, USDA's Food and Nutrition Service (FNS) asked the Institute of Medicine (IOM) to conduct a study to examine the feasibility of defining the adequacy of SNAP allotments, specifically: the feasibility of establishing an objective, evidence-based, science-driven definition of the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a

healthy diet, as well as other relevant dimensions of adequacy; and data and analyses needed to support an evidence-based assessment of the adequacy of SNAP allotments. Supplemental Nutrition Assistance Program: Examining the Evidence to Define Benefit Adequacy reviews the current evidence, including the peer-reviewed published literature and peer-reviewed government reports. Although not given equal weight with peer-reviewed publications, some non-peer-reviewed publications from nongovernmental organizations and stakeholder groups also were

In the first decade of the twenty-first century, countries within Sub-Saharan Africa reached milestones that seemed impossible only ten years ago: macroeconomic stability, sustained economic growth, and improved governance.

# Read Online Agriculture P2

## Memo November 2013

Continuing this pattern of success will require enhancing the region's agricultural sector, in which a large proportion of poor people make a living. The authors of *Strategies and Priorities for African Agriculture: Economywide Perspectives from Country Studies* argue that, although the diversity of the region makes generalization difficult, increasing staple-crop production is more likely to reduce poverty than increasing export-crop production. This conclusion is based on case studies of ten low-income African countries that reflect varying levels of resource

## Memo November 2013

endowments and development stages. The authors also recommend increased, more efficient public investment in agriculture and agricultural markets and propose new directions for future research. The last ten years have been an encouraging time for one of the world's poorest regions; this book offers an analysis of how recent, promising trends can be sustained into the future.

Cash transfers have become a key social protection tool in developing countries and have expanded dramatically

in the last two decades. However, the impacts of cash transfers programmes, especially in Sub-Saharan Africa, have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes, carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies: Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, South Africa, as well as a description of the innovative research methodologies, political economy issues and good

practices to design cash transfer programmes. The key objective of the book is to enhance the understanding of these development programmes, how they lead to a broad range of social and productive impacts and also of the role of programme evaluation in the process of developing policies and implementing programmes.

This manual presents the theoretical foundations to productivity measurement, and discusses implementation and measurement issues.
