## Financing renewable electricity in the resource-rich ...

The European Commission has published today the rules for a new EU Renewable Energy Financing Mechanism, to apply from the start of 2021. This Mechanism will make it easier for Member States to work together to finance and deploy renewable energy projects – either as a host or as a contributing country. The energy generated will count towards the renewable energy targets of all participating countries and feed into the European Green Deal ambition of

## fundingport — Financing for renewable energy (wind, solar)

When renewable energy projects are being developed, it is crucial to think ahead to future financing, sale or investment transactions to ensure that there are no skeletons in the closet that may derail those processes. Experience shows that planning and consenting is a crucial area in the process of selling, buying or financing solar and storage projects and there are a number of risks which should be identified and mitigated against.
