Japanese Industrial Standards (JIS) specifies the standards used for industrial activities in Japan. The standardization process is coordinated by the Japanese Industrial Standards Committee and published through the Japanese Standards Association.

### About JIS – Japanese Standards Association

Japanese Industrial Standards The publication and distribution of JIS (Japanese Industrial Standards) is the bedrock on which all JSA's activities stand. Moreover, JSA issues English versions of the JIS which are particularly significant from the perspective of international trade.

### Japanese Standards Association

Japanese Standards Association (JSA) strives to play a key role as a national center in our nation's standardization activities. With the growing needs for standards that are not being developed by our country's standards development bodies, JSA established "JSA Standards and Specifications" in June 2017.

### Japanese Standards Association

JSA, the Japanese Standards Association, promotes standardization and management system in Japan through the development of national standards, support of international standardization activities, support of developing human resources in standardization and management system, and promotion of conformity assessment.
