~~The Black Death and Great Plague—Causes of illness and ---~~

There were many theories at the time as to the origins of the Black Death. Some people proposed that the germs of this virulent disease hovered above pools of stagnant water in the swampy marshlands of Asia. Some suggested it started with the Jews polluting drinking water in the growing cities of Europe.

~~The Black Death—Historic-UK~~

The first outbreak of the Black Death in Europe killed millions (claims range between 25 to 50 percent of Europe's population) and it remains one of the greatest catastrophes in human history. The Plague. By 1340, medieval Europe was beset by a range of problems.

~~The History Press | The Black Death—Human history's ---~~

TJ: There's no doubt the Black Death was devastating when it first struck Europe between 1347 and the early 1350s. However the impact of the plague was exacerbated because it returned in 1361, 1374, 1389 and then in 1665 with the Great Plague of London and elsewhere.

~~The Black Death: the historians' view—HistoryExtra~~

The Black Death was an infamous plague causing an estimated 20 million deaths in Europe. Its spread and impact is disputed, but it does give an insight into a medieval way of life.

~~Causes of the Black Death—The Black Death—K93 History ---~~

So many sheep died from the Black Death that there was a European wool shortage. To avoid catching the disease, doctors rejected patients, priests declined to administer last rites, and shopkeepers shut their stores. The Black Death was not an airborne contagious disease and did not thrive during the winters, unlike many sicknesses.
