fourth edition a valuable and thought-provoking blend of the principles and practice of facility management.

Earlier editions of Total Facilities Management have been praised for the lucid presentation style and direct applicability of its contents. The third edition follows in that tradition, providing an accessible text bridging the gap between the theory of facilities management and its implementation. This book raises issues which all practitioners should consider before embarking on a particular plan, showing the link between facilities management practice and an

Get Free Total Facility Management

organisation's business objectives and dealing with issues known to concern practitioners. Building on the success and popularity of previous editions, the third edition adds new chapters on facilities planning, building intelligence, managing specialist services and information systems management, and provides a number of new, international case studies which will further broaden its appeal to practitioners and advanced students alike. From a Review of the Second Edition: "I have just finished reading this superb book and am impressed with the amount of 'wisdom' provided in a very readable form" —W.W. Badger, Arizona State University, in *Construction Management and Economics*

The significance of facilities management, as a means of handling non-core business services, is now being recognised. This book offers a progressive view of how facilities management applies to organisations of all kinds, focusing in particular on the issues of customer satisfaction and value for money. It bridges the gap between a theoretical treatment of the role of facilities management in supporting the core business of an organisation, and its implementation. It deals with the issues which all practitioners should consider before embarking on a particular plan. The question of whether or not to outsource, health and safety issues, contract administration, service performance

manager in today's built environment. Through personal stories and examples, Dan Lowry teaches the four FM knowledge domains of Operations & Maintenance, Project Management, Business Finance, and Leadership to aspiring and practicing facility management professionals of all backgrounds and education levels. This guide will enable you to understand not only what you need to learn, but how to develop as an FM in a way that brings maximum value to your organization. Through learning how to prove this value to senior management, Dan illustrates key things you can do in order to achieve maximum effectiveness in your FM career.
