This is my little how-to guide on network programming using Internet sockets, or "sockets programming", for those of you who prefer it. The sockets API, though started by the Berkeley folk, has been ported to many many platforms,

including Unix, Linux,
and even Windows.

Unfortunately, it can be
a little, um, "much" to
digest the API, but as
long as you know some
C or C++, this guide
should springboard you
into the realm of
network programming
with hopefully as little
hassle ...
